

Standing Eye to Eye with Animals

adult grey whale, 13 m

© by Ursula Tschertter, Switzerland

Project 1:1 with animals

Undoubtedly there is nothing more impressive than an encounter with wild animals in their natural environment. Or a visit in the zoo might fascinate. Just like the authentic stuffed animals in a museum. But to stand face to face with animals at home, at schools or in public offers a different dimension and experience.

Life-sized and foldable animals made of fabric (cotton, synthetic felt and/or fur).

Objectives

- to share fascination for nature and animals
- to better understand their lives and needs
 - to raise environmental awareness
- to support personal environmental acting
 - at schools, outdoors and the public

Light and easy to transport

50+ species

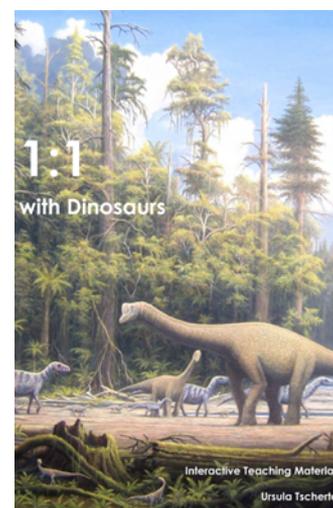

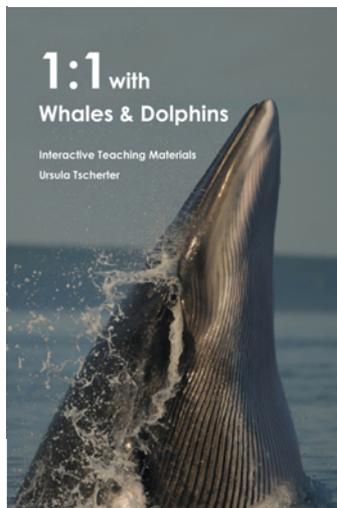

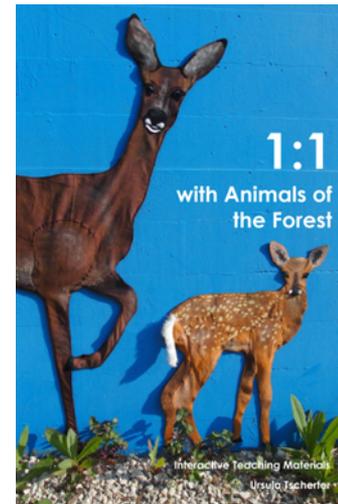

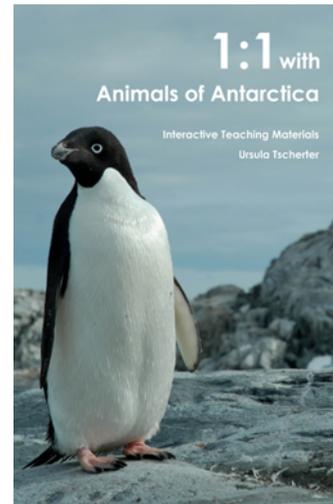

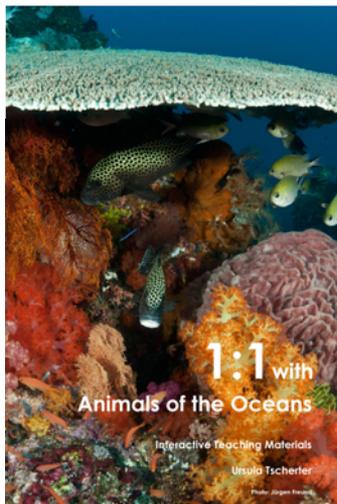

Educational boxes

- on specific themes
- various 1:1 animals
- illustrative materials
- many activities to experience animal behaviours, nature and environmental issues
- e.g. for teachers to rent

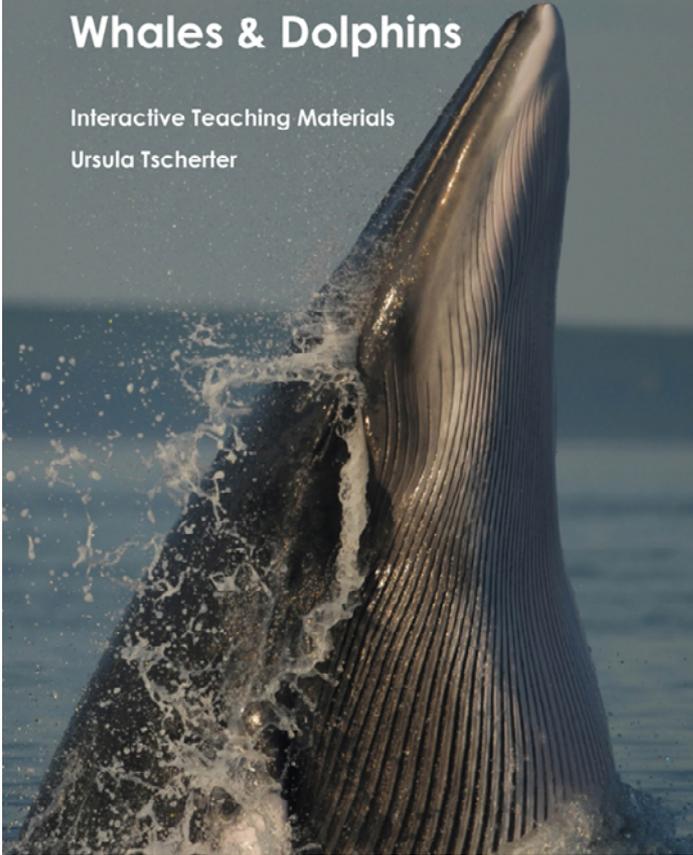

...

The following pages show 1:1 animals and educational materials in use.
